Components

Component	Value	Reference Range	Flag	Lab
CHOLESTEROL	161	<=199 mg/dL	—	ABC
HDL	43	>=40 mg/dL	—	ABC
LDL	103	<=99 mg/dL	H ▲	ABC
Comment: See LabNet for more information.				
TRIGLYCERIDE, NONFASTING	113	<=149 mg/dL	—	ABC
Comment: Nonfasting triglycerides (TG) are affected by both recent meals and patient metabolism. No reference range is established. However, nonfasting triglycerides >150 mg/dL are considered high.				
Note that if nonfasting TG are sufficiently high, then direct LDL (if TG>1300 mg/dL) or HDL (if TG>2000 mg/dL) measurements may not be valid.				

Labs (continued)

Comment: NonHDL targets are 30 mg/dL higher than LDL targets.

Labs (continued)

A repeatable HbA1c > or = 6.5% is diagnostic of diabetes. A single HbA1c > or = 6.5% can also be confirmed by a fasting plasma glucose measurement > 125 mg/dL, a random plasma glucose > or = 200 mg/dL, or a 2 hour oral glucose tolerance test result > or = 200 mg/dL. Patients with HbA1c of 5.7-6.4% are at increased risk for future diabetes.

RFC: Carlos Hardik is a 38 year old male with phimosis and interfering with sex life and urination.

Carlos Hardik is a 38 year old male with obesity here for phimosis.

Subjective:

Unable to pull foreskin back to reveal glans

Bothersome during intercourse and desires treatment

Vitals:

General appearance: alert, well appearing, and in no distress.

no tachypnea, retractions or cyanosis

Abdominal exam: soft, nontender, nondistended, no masses or organomegaly.

GU: uncircumcised, glans/meatus wnl, testicles descended x2, epididymis and cord structures wnl bilaterally, no inguinal hernia noted

Tight distal phimotic foreskin about 8mm in aperture, unable to reveal glans

No results found for this basename: WBC, HGB, HCT, PLT

No results found for this basename: CR

HGBA1C 5.4 04/18/2019

ASSESSMENT/PLAN:

N47.1 PHIMOSIS

Option of steroid cream vs. Circumcision discussed

Circumcision is removal of entire foreskin. I have explained this clearly with demonstration of either diagram, self-drawn picture, or on pt's own penis at about 5th grade level so that it is clearly understood.

Risks, benefits, and alternatives of the surgery were discussed in detail with the patient. These include, but are not limited to, bleeding, infection; anesthetic complications- DVT, PE, MI, and even death; injury to surrounding organs, including injury to the GU tract. The risk of perceived shortening of the penis, increased sensitivity, numbness, scarring, pain, and skin bridges were discussed specifically for circumcision surgery. Possibility of reoperation was also discussed with the pt.

There is extensive variability in the appearance of mens genitals and there is NO guarantee that he will be satisfied with the appearance. There can be variability in how loose or tight the shaft skin will be after circumcision and there is some subjectivity with regard to what is desirable. I can not guarantee he will be happy with this. With the glans more exposed, there may be changes in the sensitivity which may alter

Clinical Notes (continued)

sexual function to some extent. Patient also know that the procedure will NOT lengthen the penis and will NOT enhance erectile function

Informed consent was obtained after the pt's questions were answered.

Adequate time was given to patient to ask questions and all questions were answered.

Pt expressed understanding.

**Pt at this time elects for trial of betamethasone cream x 6 weeks If fail,
he will elect for circumcision as discussed above
TAV in 6 weeks**

Question

Is this medication for a workers' compensation condition?

Answer

No

Indications

PHIMOSIS [N47.1 (ICD-10-CM)]

Patient Instructions

Apply betamethasone cream to the affected area daily. Retract the foreskin as far as it will go and massage

Patient Instructions (continued)

the cream into the area where the skin is tight for 1 minute at a time. After 1 week, begin to pull the skin back with more force without causing pain and massage the cream into the tight area. You should do a total of 3 weeks

TAV in 6 weeks

Thank you for visiting Downey Urology Department. We hope that you had a pleasant visit.

If your visit was less than excellent, we welcome your feedback. Feel free to contact Leonora Llantero, Department Administrator, at 562-657-4323 or via email at *Leonora.X.LLantero@kp.org*.

Additionally, we appreciate your participation in completing any surveys mailed to you regarding your recent visit. This enables us to continually improve the quality of care and service that we provide to you. Thank you for choosing ABC Facility as your healthcare provider.

Future appointments, please call (562)657-4545

STAY HEALTHY. BE WELL. AND THRIVE

Please stop by our Check-out Window so that you may be appropriately scheduled for your recommendation(s) towards a healthier lifestyle.

Thank you
JENNIFER ONYIA
LVN

KP.ORG is a great way to access most of your lab test results, and to contact the office of your Primary Care Physician or another provider with whom you have had contact in the past 13 months.

Secure Messaging Information:

- Information is secure
- Users log in using a password they create

Your BMI (Body Mass Index) is above the recommended value. BMI for adults relates to health risks including cardiovascular disease, hypertension, and type 2 diabetes.

Please call 562-622-4150 to schedule a class for Adult Weight Loss and/or call Weight Watchers at 1-866-639-3300 (toll free). ABC Facility has collaborated with Weight Watchers to bring our members exciting new weight management options at a discount.

You are due for your Pneumonia Shot. This shot protects you from a common type of Pneumonia. For some chronic conditions (like Diabetes), the Pneumonia Shot is recommended before age 65 and again after age 65. If you have not had your Pneumonia Shot, please go to your Primary Care Phyciain's office today for a Nurse Visit.
